

The town of Karviná, with a population of more than 62 thousand residents, is situated 18 km east of Ostrava at the northern periphery of the foothills of the Beskydy Mountains in the Olše river valley. A part of the northern border of Karviná is at the same time border with Poland.

The town experienced huge development mainly after the discovery of black coal in the 2<sup>nd</sup> half of the 18<sup>th</sup> century. For decades the town of Karviná and its surroundings was an area with high concentration of coal mining and related industries. More recently, this town has become a commercial and tourist center.

The picture above shows Fryštát chateau located near the main square in Karviná. The Empire-style chateau is a unique example of its kind in a region which has been so dominated by industrialization
